# Achievement Motivation Research Group

---

Researchers in the area of Achievement Motivation in physical activity conduct multiple projects in topic of motivation, caring climate, and participant's emotions, perceptions, and their behaviors. Researchers gather annually to discuss their current research in the area, current issues in achievement motivation research, directions for future research, and potential collaborative projects and grants among the participants.

## Participants:

- Mary Fry, University of Memphis
- Lori Gano-Overway, Bridgewater College, VA
- Marta Guivernau, University of Notre Dame
- Mi-Sook Kim, San Francisco State University
- Michele Magyar, California State University, LB
- Maria Newton, University of Utah
- Doris Watson, University of Nevada, Las Vegas

## Current Projects

- The influence of leader efficacy and emotional intelligence on personal caring in physical activity
- The psychometric Properties of a Caring Measure in Physical Activity
- The relationships among contextual caring, Affective Self-Regulatory Efficacy, and Mental Well being among Youth Sport Participants
- The influence of the perception of caring climate on character developments among Youth sport Participants
